Lauren: Welcome to another healing conversation brought to you by acoustichealth.com. I’m Lauren Galey and today, we’re talking with Earl Backman. He is a medium trance channel who started channelling after he was visited by three entities from the spiritual realm in September of 2009. We’re gonna learn about how he discovered these light beings, we’re gonna talk about the shift into new humanity, and how we can manifest what we want to have happen on our lives. Welcome, Dr. Earl Backman.

Earl: It’s a pleasure to be with you, Lauren.

Lauren: Now let’s talk about your first experience when you were visited by three entities. Did you see them? Did you feel them? Did you hear them?

Earl: Yes, yes, yes. My wife and I were going out to dinner on a 3rd Friday night of September of 2009, but who really keeps track of things like this? And all of a sudden, she could feel because she has some psychic tendencies herself, that I was not in my body. And by the time, fortunately, by the time she was driving, we got to the restaurant, my body was just shaking almost uncontrollably. And at that same time, I closed my eyes and I could see these three light beings. They had shape but no form. First time anything has ever happened to me like this at all. I would have been the last person I would ever thought that this would happen to. And so she immediately said, because she was not concerned since she does regression work and knows all the kinds of things when people see and feel they’re in a trance state. So we went home immediately and I just talked on the way home, and which was a short trip. And these beings started, they just said they want to speak through me. And Linda recorded the following, the discussion that then ensued. And they basically said they have been trying to reach me for 25 years, I wasn’t ready but they kept trying. I would associate and feel like it was trauma-related from a past life or even perhaps this life. And they basically said they were here, they were working with 4 others – we’ll refer to as enlightened Earth beings – and that is, those are Earth beings that are interested in why they are being embodied as of this time. Know they’re here to be of service and they wish to know what that is. And so they’re called enlightened Earth beings and they were working with 4 others besides myself, and we were all what they referred to as warrior-types, meaning we have had most of our past lives but then I know of 30 or 40 of mine that I have been a warrior. Which means, I have a large physical structure, I’m well over 6’5” and they have indicated that I was the smallest of the 5 they were working with. So you can imagine how big the others must be. And it is because their energy is so intense, initially my body...
would just shake because they take over my body totally. So that sort of how it happened, I saw them and then they started to speak through me.

Lauren: We’re gonna hear what some of those messages were. But before we move on, I wanna talk more about that body shaking. There are some people who have experienced that body shaking and are unaware of what it is. So it was really good that Linda was there to help you through that. So do you feel that this is something as well that other people experience but they shut down, they don’t let it flow?

Earl: We know that it’s because we’ve talked – I’ve done hundreds of channelling sessions now and presented at workshops and trainings and so forth that we do. And Linda has, in her between lies regression work, she’s regressed people where they regressed to another universe, to another place. And during this process, the intense energy causes their whole body to just quiver and shake, sometimes literally bouncing off the sofa. And so, yes, it’s more common, and when some of us when we’re first learning to channel our guides, those spiritual beings that guide us all the time, that we’ve had since incarnation began, sometimes that energy is so intense that it causes our whole body to quiver and shake. It happens to a lot more people than we might think.

Lauren: I know that there’s some, even my sister-in-law and some other people who, sometimes when they’re meditating, so it seems like they’re on the edge of something there. But they’re alone so they don’t know what to do with it. And then others who completely have no clue and they freak out completely, and they’re put on anti-depressants.

Earl: Right. Sometimes it happens. When individuals are experiencing something for the first time or a place for the first time, from the cellular level, from the body level and not from the mind-conscious level, they are – they begin to re-experience a past life. So their beginning is what is called past life bleed-through. Because when our soul incarnates lifetime after lifetime, it carries the imprint of previous incarnations where in fact trauma-karma issues are attached to the soul. There are times then when they get trickier, not through a planned past life regression with a regression therapist, but this happened to me the first time in Ireland where I went to a cemetery and I immediately started to shake. And I had no idea what was going on. And it turned out that I’d had a Viking life there and I ended up dying in that spot.

Lauren: Wow!

Earl: Often, those things are triggered by a past life memory that starts to bleed through, and yet you have no conscious awareness of this. So you think “Oh something’s wrong with me. I have some disease. I have some psychological disorder or whatever,” when it’s none of that.

Lauren: That should be good news for the people who’ve experienced that and they should most likely seek a regression to heal that.
Earl: That is the best way. The whole reason for having a past life regression or even understanding your past lives is to delete things that are blocking your progress in this lifetime for moving forward. The light beings tell clients this all the time. The reason they can’t move forward on their soul purpose path is that they’re being blocked by karma or trauma from a past life they’re not dealing with. And until they emotionally, consciously and in all ways, accept what this trauma is - and sometimes it takes a past life regression in order to embrace where this came from – then you cannot delete it. You cannot delete something that you do not hold on to and accept. So when you do that and when you can delete that through past life regression, then you can move forward to achieving your soul purpose, your soul intention in this lifetime. It’s the whole reason why the light beings are working through me right now: to help people find their soul purpose path, to fulfil their soul intention and to clear up blocks. And those blockages can be relationship issues, physical issues, emotional issues, psychological issues – trauma things that they have brought forth in this lifetime because they have chosen prior to this incarnation that this is something that they needed to deal with. And the more advanced you are as a soul, meaning the more past lives you’ve had, and as you are moving closer and closer to ascension, then often the difficulties that you’re dealing with including this incarnation, they’re more challenging than ever before because you’ve done the easy work, you know. It’s like you’ve been through first, second and third grade, now you’re all of a sudden in grad school. So the issues you have to deal with are much more challenging. And many people are feeling that right now.

Lauren: Yes, so what’s going on because they’re feeling it on an astrological level on this great shift of the ages? Why is that happening to so many?

Earl: This is one of those what is known as one of these 25,000-year cycles where the Earth goes through massive transformation and those inhabitants on the Earth feel it at all levels. So what we have, of course, is re-alignment of celestial bodies and the spiritual realm. You have the masters - the masters of the hierarchy - those individuals, those spirits - the Buddhists, the ___, Mother Mary, all religious traditions have these spiritual beings - they are ramping up the energy because they know it is a critical time for a major transformation on this planet. And those of us mere mortals, these enlightened Earth beings feel it from all levels. We’re feeling the planetary shift, what’s going on within the Earth itself. The vibrations caused by the increased earthquakes, weather patterns, there’s a lot – all of this is happening right now because it is one of these planned cycles and many, you know, there’s a lot of talk about 2012 and December 21st of 2012, and the ending of the Mayan calendar. And that’s because that’s all the ___ of the Mayan calendar went. Now, so what we’ll have this shift in 2013, based on my sources and the channelling, is that the issues we’re dealing with right now, we will continue to deal with. And the way we manage is to accept what is going on and see these changes and opportunity for growth. And it is hard to see things as an opportunity when they all look like are challenges to us because physical things, a lot of people are choosing – they can’t deal with the energy right now – a lot of people are choosing the leave the planet right now. There’ll be an increased number of
those who are transitioning because they can’t... One of two reasons according to the light beings: One, they can’t deal with the pressure, it’s too stressful. It’s just too hard on them. And then secondly, they have fulfilled their soul intentions in this lifetime and they are actually needed as a guide in the spiritual realm. So you have a lot of transitioning that are younger than what we would normally think as a normal age to leave n incarnation, because they are needed in the spiritual realm. And I’ve done a lot of channelling for people who’ve had young adults’ children die or spouses die and they wanna know why and so forth. The light beings are very clear about why they needed to transition at this time. Why they made that decision. And you know, it doesn’t change the pain and the grief that those were left behind feel. But that does give meaning to an explanation to why they are leaving at this particular point in time. So it is one of those major times of transformation, and we have those in periods of history. It’s just that most of us don’t remember when we were going through it previously.

Lauren: Let’s jump back before we go further and for the skeptics out there who may not think that they can trust their imagination as they’re being regressed. How can we discern and how can we trust that past life regression is not just our imagination?

Earl: That is really a very good question. And it’s a question that Linda gets all the time. We’re both trained to do this work but I tend to run the practice and schedule her. She’s the one who does the regression sessions. That’s often said that even people who decide they really want a past life because they know they’re stuck and they feel like there is something - and frequently it’s a physical or psychological issue or it’s a relationship issue - that doesn’t make sense in terms of their current life and so they seek this. The only thing we can say is that the details that are given, that the client speaks, you know this regression work is different than I do, or what a psychic does or a medium does, because that information all comes through us from the spiritual realm - either individuals, psychic individuals - they’re connecting with loved ones on the other side, or a being that’s being channelled. The beings I’ve channelled have never incarnated on Earth, but the beings’ many channel such as Jeshua, also known as Jesus, that many channel, they obviously have had lives on Earth. So, what happens in the regression is that you, the client, speaks the information. They describe the information. Linda just guides the situation, guides the regression session but she has no leading questions. Everything is open ended. And the detail, and often the physical response, and the emotional catharding and letting are far too difficult to make up. Linda can tell when someone is making it up. It’s just that there’s not the details. But most people aren’t willing to pay to make something up. So from the clients’ perspective, even though that they are somewhat doubting, although someone who’s totally skeptical and doesn’t believe it at all are not likely to have a regression, and our take on that is, you know, you don’t have to believe it. Just like you don’t have to believe in God, you don’t have to have a religion, you don’t have to believe anything you don’t want to believe. On the other hand, in the thousands of regressions Linda has done, we have seen miraculous healing take place. And if it’s they made it up and it’s all a metaphor, you know what, it really doesn’t matter. If
the person feels that the problem that they’ve had for years and years is gone, that’s really all that matters. It’s all about helping someone understand who they are at the soul level, to help them understand why they’re embodied right now. To understand how to make life a bit easier. And if it works, you know, to me that’s all that’s really, really relevant. And like I say, we’ve – Linda’s hardly had anybody, just a small handful of people who could not go into a trance state through her hypnotic regression process, and they find out amazing things.

Lauren: Well thank you for clarifying that. It does make a lot of sense and if someone feels whole or better after wards, then you’re right it is all that matters. Now, the light beings, when you first started channelling them, what were those first messages that you got?

Earl: The first message is really had to do with who they were, where they’re from – which is another galaxy, an adjoining galaxy – and when you realize how many millions of solar systems there are in our galaxy alone, and then how many thousands and millions of galaxies, the universe becomes, you know, almost impossible to comprehend. And which is very interesting is that astronomers and scientists are finding more and more planets, more and more solar systems. And - so clearly, the universe is so far vast that, you know, our mere minds can’t even (certainly mine can’t anyway) wrap his mind around that. So initially they really, they talked to me about essentially, as you see I’m a medium in trance, so I remember nothing. They take over my body, then the scribes or I record my sessions for the clients. It was really setting the stage for what they were going to do to me by saying where they were from, why they are here, being wanting to ask my permission to be able to use my body, and for the first six months – maybe even the first eight months – all they did was, all I did was channel them every night. Linda has probably three journals of extensive notes and messages why they’re here, what they’re going to be doing, who they want to be working with. And so it was at least 6-8 months before I started channelling before anybody else. I was nervous, intimidated, I thought, you know, this is... after about 6 months or maybe 8 months, I can’t actually remember for sure, they finally said “Now you realize that we didn’t come all this way to work with you just so you would have this experience,” that there were much bigger things in store here. And then of course then I really started to panic because I had no vision that I was doing it for other people, or I was doing it in group settings. But then it started in some of the workshops that Linda was doing, that I would do a 30-40 minute channelling session at the end of the workshop. And the response was, just was incredible, I mean, so I’ve been told. And then, it just sort of built from there. And then about maybe 18 months ago, I started doing individual 90-minute channelling sessions, recording them. And it covers the gamut on what the light beings provide input. It is amazing the basis of knowledge. They provide input for people on relationship issues, work issues, moving, why they’re embodied. There are certain questions that individuals ask that they will not answer. And they will not answer them because they refer to them as discovery questions - questions in which the value of understanding the answer is partially found in the process of discovering the answer. And those questions are: “What is my soul
purpose? Why am I in body?” They will help the person find the answer to that. Or if the person says “I think I’m really here to be a hands-on healer”, they will confirm or deny that. They will validate things but they will not initially suggest it. Same is true if somebody wants to know who is their soul guide. So they will help them so as how to seek the answer. They help clients a lot dealing with the issue of fear. They have what is called, they talk about what is called a manifestation process, how - and there are four steps to that - on how to help people get what they want out of life. And it’s so simple. We’ll all think that we should already have that in our mind to begin with, but it’s a powerful tool that they speak to a lot of people about. But fear is the emotion that holds so many people back so they talk a lot with clients about how to get rid of the fear. So initially in those first few, they talked about a lot of setting the stage, let’s put it that way, setting the stage for what they were going to do with me. Because I mean, I have a PhD in Political Science. I spent, you know, 27 years in higher education. This wasn’t what I had planned for my later in years work. And so, it really caught me by surprise. And so I’ve been someone of the reluctant learner, although now I fully engaged, I channel now upwards of 4-6 hours a day. And I do a monthly group channelling session over the phone so that people who can’t afford perhaps to have an individual session, they can sign up for that because it’s really modest in price. And so, I’m to be doing this. The people ask me “Where do you go? If you’re not in your body when the light beings take over, where do you go?” And all I can say to them is this is one of the great mysteries of this process. I haven’t a clue where I go. I know I go away quickly and I come back quickly. And I have no recollection of what I’m saying. And I channel, you know again, I channel only these three beings. There are many people who channel 4, 5 masters and they can channel and they can understand different voices and messages. I’m not like that at all. I can’t talk to people’s relatives and family members who have crossed over, I’m not a psychic in that sense. You know, I’m pretty intuitive, obviously from that perspective, but there’s a lot of things I can’t do. I don’t proclaim to do that. And the light beings do not do past life work either. Somebody wants to understand what happens in the past life, they’ll say you’ll need to go to a past life regression. We can’t look into what your past lives were. Because they’ve never incarnated on Earth, so they do not have access to the ___ records. The ones who can look at past lives, individuals like (my mind’s blank - somebody we send a lot of people to because he’s a well known channel, he was Shirly McLaine’s channeller when she wrote her first book – oh it doesn’t matter. The beings that these persons channel have all been incarnated before so they’re able to access individuals’ past lives. I can’t do that.

Lauren: Well then lemme ask you, where then are they from?

Earl: All they will tell me is that they are from an adjoining galaxy. They will not give – they said there is no point in giving you the name of our homebase, it would make no sense to you because your planet, you have not identified any bodies, any celestial bodies, star systems, planets in our galaxy. So that’s all I know. They’re not from our solar system. I, oh might as well just let it all hang out here, I would say 95% of the people I channel for who would just come to me, wherever they come from, are ETs. They are not – they are in an Earth body at
this time, they volunteered to be here, they are all too a person, and I’ve done hundreds of them, they are all too a person, very advanced souls who have all volunteered to come here to help humanity. And then many of them have a great deal of problems being in an Earth body because they come from places where they do not have a dense body. Many of them more often have an ethereal body or a light body – much like the beings that I channel. And the light beings say these people come to me not because of where I come from because I have been on Earth since the planning of the first soul seeds of this planet. I have not been myself in any other celestial bodies, realms, and so forth. But the beings I channel are certainly ET’s. And part of the reason is I’m there to use my body to help ET’s understand more, or parents of ET’s to understand more why they’re here. Why they’re having such a problem and how they can improve their living situation, be it physical - you probably know this - so many of them have problems with physical problems, medical problems, eating problems, relationship problems, and other things like that, because they’ve not been ere many times. Some have only been here once or twice and so, and that could have been a thousand years ago. So, it makes it really challenging. So I long to work with these beings, and if you told be two and a half years ago that I’ll be working with ET’s, I would have not, not me. But I do -

Lauren: So exciting, fascinating. What I realized when we’ve gotten a huge movement even in front of Congress to have the government disclose, I realized that we, the people, are disclosure by the truth that we are able to speak of the government coming back to confirm or acknowledge that truth. Are you in Boulder?

Earl: I’m actually just outside of Boulder. I live in _____. It’s an appropriate place for me to live given how many people think the work I do is pretty eerie.

Lauren: Did you see on Saturday, a large leap cloud in the sky over the flat irons in Boulder? It looked like a float ship. Did you see it?

Earl: We did not because we were in Denver taking care of our grandchildren. I did not know that all the while. Certainly in the past, I’ve seen many lights that look like ships, then I’ve had I known it might, sometimes are taken from my body, and journey my spaceship to ____. So I mean, I certainly have no – I totally believe in these things and these visits. And I know that many ET’s that are embody are here to prepare the planet for ET’s that arrive that look like the way the look in their home planet, not taking an Earth body. But the thousands of ET’s that I am aware of who are in Earth bodies are here in some respects, not necessarily the first ____ because ET’s have been coming here for a long time, but are here to help prepare the planet and humanity for a greater acceptance. Even though you are so right that the political powers could be - have for decades refused to admit that we have visitations.

Lauren: And that, I don’t know if you’ve heard this before, that Star Trek is real?

Earl: Yes.
Lauren: It is, it is, right?

Earl: Absolutely.

Lauren: In Peru, have you been down to Peru?

Earl: We have not. It was on our schedule a couple of years ago and they had that big rain, massive slide that closed the hiking trek all the way up to the top of the mountains so we have not made that.

Lauren: Well, there is a — they call it the “Alien Museum” — and it’s on the road from Uno to Cuzco. It’s a 10-hour bus ride. And on the way is an ET-alien museum.

Earl: Wonderful!

Lauren: A structure, sacred site structure they did ceremony, you can feel the energy. It was quite amazing. The museum had found these stone objects - stone sculptures - that were just left behind. One of them looks exactly like ET. When we were visiting in front of this stone structure, everyone went up to it and felt really attached to it. It gave me the sense that this is what ET’s can look like and our experience with it is to remove the fear so that when there is a meeting place, there will be no fear.

Earl: Yes. Linda, as I said she’s done a lot of past regressions with ET’s, and when they went, as well as between lives regression, and when they leave their body in the trance process, many of them journey to their home, what we’ve referred to as their home base, their home planet. And they immediately begin to describe what they look like. And she’s got notes upon notes of how, what the beings look like in their home planet. One more recently was one, and they said “I’m a Komodo dragon, I look just like that.” And others say, you know “I’m just all white”. And you know, others will say “I look like a cross between this kind of an animal and that kind of an animal.” And some will say “I’m like a fairy in an, from what you might think of fairies in Ireland, what they look like”. So it is amazing how - the variation, and you know, even my linear logical left mind, left brain - so I’m not having trouble imagining that – why would they necessarily all be the same if they all come from different places?

Lauren: Really, really fascinating. When you say that you’ve been here since Earth, are you speaking Lemuria?

Earl: Pre. Pre-Lemuria. I was at Lemuria. I was at Atlantis. Literally, I’ve been told in a number of channelling sessions is that I was - I arrived with the first seeding of this planet with human beings. And I’ve been here ever since. And most of my lives, documented lives, I’ve been a warrior. And just about every military campaign or an adviser to - that’s just - we have primary roles that we play and there are various ones, and there are various ways in which to look at the microteachings talk about the various roles that our primary roles - that we play in our lifetimes. And some have, some like me are almost always the same. I have the
same body structure that I probably had in 60-70% of my hundreds or hundreds and thousands of past lives. And so, I’d feel so comfortable with my body where other people don’t. And it’s because I just like, chose the same old body. I looked in the closet, buy my incarnation and “oh, let’s just use this one again”, whereas others change all the time. And now I realize, partly the reason, and I started out as a warrior in this lifetime and was gonna be a soldier, but that plan went awry, and so I’ve become what now I refer to as a spiritual warrior. And the whole purpose of this transition for me in one sense, is for these light beings would be able to use my warrior body to do what they came here to do.

Lauren: When you say that you were here pre-Lemurian, is that even what the builders have formed the Elohim?

Earl: You know, there’s a lot of details I do not have. Really don’t have. I don’t have a past life memory prior to Atlantis. But I’ve been told in a number of channelling sessions by other very reputable channellers that I’ve – that I had previous lives long before Atlantis. And so, all that is really vague, that’s really going more on what I had been told than any discovery on my part as opposed to... My very first past life memory was when I was 8 years old and I remembered that I had been in India in one of my past lives. It started to bleed through. And you know, what 8 year old even knows what India is? I had to look it up. I can see people with turbans riding elephants, I could see them and I didn’t tell a single soul about this. But then, and then I soon forgot it. And then in undergraduate and graduate school, I’ll bet I took 25 courses on India, religion, culture, politics, history – all – and I had no understanding of why I was taking these courses. And next December, December of 2012, I’m going to India for the first time, and I’ve never had any desire to go there but I am being told that this is my time to go to India for 2 weeks. So I’ve had this belief in reincarnation since I was 8 years old even though I never talked to my parents about that. I’m not sure what they got about that. I just knew I looked before.

Lauren: And so have you had any karma to clear from past lives or had to go back and reclaim any of those past lives? As you say that now, you’re a spiritual warrior, in those other past lives, could it have been that “warriorness” could have been other experiences that might have been negative rather than –

Earl: You think – I try to think that in my thousand plus lives that I was a warrior, that I’m always a kind and generous warrior. But the truth is not. I - the program isn’t long enough for me to outline all the deletion work I had to do on my warrior lives. The thing about it is you can often do deletion on one aspect that cleans up a myriad of karmic issues from a myriad of past lives. So you don’t have to do something with every one of them. For instance, I was a crusader twice and actually led one of the crusades as King Edward I, the very actually last crusade I led. But in my first crusade, I was captured by the Muslim warriors and my left eye – I was tortured – and my left eye was burned out. I have vivid memories of this. But I didn’t have these memories until I was in Israel about 5 years ago and we were overlooking, and it was at night, and we were overlooking the western wall of the hotel. And from hotel, and all
of a sudden, I realized I could not see anything our of my left eye. It was totally dark. And I tried not to panic. I told my wife, I told Linda, I said “You know, we’ve had a wonderful evening and a great dinner and it’s so warm and nice, but I need to tell you that I can’t see out of my left eye. And then the past life memory started of this crusade life of burning my eye up. Well, we didn’t know what it all meant. Two days later, I was in the operating room having surgery to repair a detached retina in four places. They said I almost lost my vision and they said they’d repair it. The best they could repair it 20/80, maybe a 20/100 correctable. I had 20/20 vision in that eye right now. And I wasn’t to lose my eye, it was really a message to me to delete the karma, the trauma around this earlier life. But so tell me I needed to be a lot more intuitive. This was a couple of years before the light beings visited me. This was an eye awakening, no pun intended, for me to look at how physical issues we have, there’s a message to them, there’s a reason. It’s not because we’re a victim, it’s not because something is happening to us, we’re experiencing something for a reason. And as soon as I understood, after spending a week with my head down ‘cause I couldn’t, that’s the treatment, that’s the post-surgery thing for this retinal surgery. It came to me that I was to be using my right brain to be a lot more intuitive, introspective, that I was to have keener eyesight to help others. And then I can hear people say “Oh no, you’ve just got a detached retina coz you’ve got weak eyes” and oh like I’m, maybe that’s true, you know. All I can say is “That’s what came to me.”

Lauren: Yeah, that’s fascinating. That is very fascinating. What about birthmarks? It is said that some from birthmarks from the body may reveal past –

Earl: I have one. I have one on the side of my head and that I know it was where I was shot in one of my past lives.

Lauren: Okay.

Earl: And that happens a lot. There’s - Ian Stevenson, he’s no longer on this side but he’s done a lot of the seminar work on past lives of children. There’s another former colleague of his now at the University of Virginia who’s continued this research. And they’ve done fascinating work, mainly with children in India who have these anywhere from ages 2-5 have these spontaneous past life memories of their childhood and they’d come back so quickly that then these past memories can be documented. Many of them have birthmarks, scars, weird looking scars, because of the way they died suddenly in their previous incarnation. The work of Ian Stevenson and a couple of people are just amazing. And it makes it... You read these works and it makes it - you really have to be a skeptic to not believe in this - when you read hundreds and thousands of cases that are not made up. And just because one doesn’t understand something doesn’t mean it’s not true. And just because it’s not within your frame of reference because of your own religious upbringing or own cultural orientation or whatever, I’m sorry it just doesn’t make it true - it doesn’t make it not true. And so, his work is fascinating and I think it’s done a lot to open individuals’ eyes up to reincarnation, past life experiences, being able to delete karma, trauma from a past life that
you – Linda refers to it as your soul DNA – that you bring these things into a lifetime. And it could have been a lifetime, you know, 500, a thousand, 2500 years ago. It doesn’t have to be your most recent lifetime. It’s just that you are not ready to deal with it, or you try to deal with it previously. A lot of healers, hands on healers, have been healers in other lifetimes because that’s their script. Mine’s a warrior but a lot of healers, that’s their script past life after past life. Many of the times, they really suffer traumatic deaths because their healing and what they’re trying to do isn’t typical to the norms and culture of the society. You know, so they’re the witches of Salem that are burned, or they’re the people who have a new way of healing something and it goes against the traditions of the time and so they’re punished. And they come back into this lifetime as a healer, but then they have all these anxieties. And until they can get in touch to what’s blocking them from moving forward in their healing practice, they can’t do that until they can see that they need to delete the trauma and karma from what they’re carrying around. And that’s what specifically to do in this lifetime.

Lauren: Yes.

Earl: And it’s not an easy process, you know. It’s taken me a long time to deal with some of the karmic and traumic issues of being a warrior. And it’s accepting the fact that I’ve done really horrible things to people.

Lauren: So when you go to India just be prepared that you may have a past life remembrance come up.

Earl: I will probably have. I know of at least two past lives now that I found out in India, and I was a warrior in both of those. So I think you’re absolutely right. There’s probably no doubt about it. And it’s probably why I’ve had some hesitancy about going to India. I mean, we’re blessed, we travelled a lot in parts of the world. Much we still haven’t seen and we’ve yet to see. But India has never been high on my list of places to go and there’s a good reason for that.

Lauren: Yeah, you’re facing that.

Earl: ______

Lauren: Yeah, exactly. You’re facing that. Well Earl, I’d like to see if the light beings have anything to say about our current economy and what we can do to stay calm throughout this year.

Earl: Welcome. Thank you for inviting us in. As Earl says, he goes away quickly and we come in quickly. We’re pleased to have the opportunity to address questions that you might have, Lauren. Please ask your first question.

Lauren: We see a lot going on with the financial breakdown around us and many people have lost their jobs. How can people make it through the coming months and year to be at ease and grace with this transition?
Earl: We wish we could say it’s only going to be this coming year but unfortunately, it’s going to be over the next several years. That there is going to be a further breakdown of the financial system because until it breaks down even further, until there is more monetary problems, change will not take place. Because those who are empowered to make the change are going to be the most reluctant to make the change. So they will fight and hold on to their power base, and it’s irrespective of whatever political party they happen to belong to. Because their goal is maintaining power and maintaining stability as they know it. So for those of you who are not in the realm of power brokers, who are not in a place of affecting direct change, what is important is that you stay optimistic. That you stay and focus – things are not happening to you, they are happening around you and they are... their situations which are not pleasant for you to deal with. But you volunteered to be here at this time, to be a change agent. So what is most important for enlightened Earth beings is to be sure that they’re doing what they came here to do. Because if what happens is if you have hundreds and hundreds and thousands and millions of individuals all focusing on accomplishing their soul intention, that groundswell, that sense of community that builds will force change perhaps beginning at the local level. And you saw pieces of the occupied movement only to give an indication of what is possible. There will be much more of this in the ensuing months and ensuing years. And what is going on in Europe with the Euro crisis, these things are going to magnify. Or a situation where Japan is actually going backwards in terms of exports. It’s not that long ago where Japan was the economy of the future, and now it’s going downwards. This is all going to continue to happen. And it is most important that enlightened Earth beings such as yourself not go into your cave. This is not a time to go into your cave and hide from the world. This is a time when enlightened Earth beings must step up to do what they came here to do - working in groups, working in community, making changes happen to the point that the powers-to-be have no choice but to make changes. It is a daunting task but it is what those of you who are embody at this time have volunteered to do.

Lauren: Thank you, we are stepping up into our roles and I thank you for being able to work with Earl to achieve that. Another question regarding this whole illuminati financial breakdown, if there are reports out that Earth beings are able to let the truth come out, wouldn’t it be setting up those in charge, the powers that be, for mass arrests?

Earl: It is possible but it is unlikely even in a country that you reside in. It is important that while you work for change, that you also not become so focused on conspiracy theories. That you find a bogeyman behind every door try to prevent good things from happening. There are many, many enlightened Earth beings who are in places to make things happen. In corporations, in politics, they’re just the minority. So the key is not focusing on what is bad, what the government is doing, no matter what they are. Focus on can-be. Focus on unity issues. One are the things that we and many of the masters find most troubling right now is the power of religion. For it inhibits some of the most important changes that need to take place in the planet. This is hard for many earth beings to deal with, that the religions
practice do not practice inclusivity. They practice separateness. And this makes it very difficult to create community and unity. And so, religions need to be out of the competition business and they’re not. They compete for the souls of Earth beings. If they only knew, they can never have the souls of Earth beings. This is just one of the great myths of religions. Religions serves needs but it is dysfunctional when it comes to moving your planet forward. This will eventually become known, but at the present time, it is a challenge for the spiritual realm that want to work with enlightened Earth beings, and they want to work with them in helping them accomplish what they came here to do. But the religious institutions that currently exist make that an even greater challenge.

Lauren: So just like the change in the fall out in the financial sector, we really need to have that occur in the religious sector and that is not an easy task.

Earl: That is true. If we think that the financial sector is a challenge, the religious one will be an even greater challenge. And we’re seeing that now. We see it from outside the planet. We see it when we look down and we interact with Earl and those with whom he channels, and see how even for political gain candidates have to invite fear and use the religion card, the cultural card, as a way of separating them from somebody else. It’s not about bringing people together. It’s about forcing them apart.

Lauren: That’s such a simple message and so potent, community and unity.

Earl: That is the way we see it. That is the way the masters of the spiritual realm see it. And that is why they and we will continue to work with enlightened Earth beings who wish to step up, not step out, but step up to the plate to do what they came here to do and not step out of their obligations and responsibilities.

Lauren: Thank you, great light beings. Thank you.

Earl: You are most welcome. We will allow Earl to return now.

Lauren: And thank you too for listening. If you’ve enjoyed this program, please share it with your friends so we can get this important information out to the world. This music was literally created by the universe as mathematical equations were assigned to musical notes. The result is this beautiful music.

Earl: Okay.

Lauren: Well, thank you Earl.
Earl: You’re most welcome. I hope their answers didn’t take so long. They can get very windy at times as Linda says.

Lauren: (sorry can’t understand)

Earl: Okay. No, there’s a time thing here. But sometimes they can take 20 minutes to address what it seem like a simple question, but to them it’s not a simple answer.

Lauren: Well, I wanna thank you for the work that you’re doing as you are stepping into work, inspite of your initial doubts and scepticism. Thank you for stepping into your world here.

Earl: Well, I certainly honor you and your program and what you are doing to provide information and to others who really are very much interested in understanding what is going on on the planet right now, what is their role, how do they move forward, how to survive. And in fact, not only how do they survive, how do they thrive in times of great discomfort. And so I wanna thank you, and blessings to you and your program.

Lauren: Oh well, thank you.
